Keeney Manufacturing Co.

Designer and manufacturer of brass products for retail and wholesale, Keeney reached out to Ravex Systems for the 2017 expansion of their offices. Through the expansion, Ravex Systems acted as the primary contractor by installing new outlets, switches, conduit, and wiring to both the new offices that were built, but for both Keeney's showroom and cafeteria as well. Ravex Systems implemented the planned layout for the planned new construction for the office spaces.
